

Stavex[®]

Multi-grip, high strength steel and stainless steel breakstem fasteners.

Key Features and Benefits of Stavex fasteners

- High shear and tensile strength provides strong, vibration resistant joints
- Stainless steel option provides high corrosion resistance and is ideal for applications requiring elevated temperatures
- Multi-grip capability accommodates wide variations in material thickness
- One fastener can be used to replace several standard grip fasteners thus reduced fastener inventory and simpler stock control
- Good hole fill compensates for irregular, oversized, slotted or misaligned holes and can stop movement in non-standard holes
- Retained stem avoids damage, electrical problems or rattling caused by loose stems
- Provides a large blind side bearing area against the rear sheet
- Spreads the tail bearing load/clamp load on the rear sheet making it ideal for use in thin sheet materials

Specifications for Stavex fasteners

Sizes:

3.2 mm – 6.4 mm
(1/8" – 1/4")

Materials:

Steel, Stainless Steel

Head Styles:

Dome, Large Flange,
Countersunk

Typical Placing Sequence

Assembly Applications for Stavex fasteners

- Automotive
- Commercial vehicles
- Domestic appliances
- Electronics
- Electrical equipment
- General light industrial
- Heating and ventilation
